

Hiring Pipeline Note — April

Human Resources · FICTIONAL COMPANY TRAINING MATERIAL

Open roles

Ten roles were approved for FY2027: four warehouse pickers, one warehouse shift supervisor, three online customer service, and two retail store assistants. The office data analyst role was held back.

Progress

Six offers have been accepted. The two retail roles have not been advertised yet because the store opening dates moved to May.

Risk

Warehouse pickers are taking an average of 21 days to fill, against a company average of nine. If this continues the peak-season cover will be short.
