Version 3.0

Lab 15 — Use the Skill from Word Without Opening Excel

Topic 04 · Staff Questions, Repeatable Work and Advanced Claude · approximately 20 minutes

Where the files for this lab are

Every file this lab needs is inside one folder that came with your course materials. Open the labs folder, then open this folder inside it:

```
labs/lab-15-use-a-skill-across-excel-and-word/
```

Do not look in any other lab folder. This lab is self-contained.

Goal

The quarterly update is due and the figures are in a workbook. One short line, and the skill reads the workbook, works the numbers out your way, and writes them into the update.

What you will produce

A completed quarterly update with figures drawn from the workbook, saved as a final copy.

Before you start

- Lab 3 completed, with the staff-numbers skill saved.
- The Claude Desktop app installed, and Word available.
- Both Lab 04 files in this folder. Everything is local; no work account is needed.

Steps

Follow these in order. Where a shaded block appears, type or paste it exactly as shown into Claude, then read what Claude proposes before you accept anything.

1. Open Lumina-Living-Lab-15-Q1-Update.docx from this lab folder. It is the quarterly people update for the leadership team, with the figures still missing. The staff data is in Lumina-Living-Lab-15-Q1-Staff.xlsx in this same folder — do not open it.
2. Open Claude Desktop and give it access to this lab folder. The Word panel can only see the document you have open; reading a second file needs Desktop. This is the same difference you have seen all course.
3. Ask for the update in one short line. Do not explain the totals, the leaver rate, the formulas or the finding — say none of it. Your skill already knows.

Prompt to type into Claude:

```
Check the staff workbook in this folder and add the figures to the Q1 update document.
```

4. Read what it produced. Every rule from Lab 3 should be there: totals by team, the leaver rate to one decimal place, the worst team named and explained. Check two figures against the workbook yourself.

5. Notice what Desktop did with the document: it produced a copy for you to download rather than editing the file you had open. Save it into this folder as Lumina-Living-Q1-Update-Final.docx. Write one sentence at the end saying which team leadership should act on first.

Check your work

The update contains totals by team and the leaver rate to one decimal place, the worst team is named and explained, two figures were checked against the workbook by hand, and a file named Lumina-Living-Q1-Update-Final.docx exists in the folder.

If something goes wrong

- **Claude cannot see the workbook.** Confirm you gave Claude Desktop access to this lab folder, not to a single file.
- **The figures do not match the workbook.** That is a finding. Ask which cells it used, and check them yourself before trusting the update.
- **Claude ignores the skill.** Name it: 'Apply my staff-numbers skill.' If it is missing, check the plus menu, Skills.
- **Desktop edits nothing.** That is expected. Desktop produces a copy to download; save it into this folder yourself.

Challenge

Add a stop/go decision rule for the weakest hiring after four weeks of evidence.

Reflection

What did you not have to explain this time that you spelled out in the last lab?
